7th Grade Newsletter

Mathematical Science

We took our first quizzes in Science and Math this week. Students learned the importance of paying attention to the material they are told to review and being ready for the quiz. Many have asked about re-taking the quizzes if they do not like their score. We do not allow re-takes on quizzes. However, if they sign up for the Quiet Work Room during Download time, there is a procedure they can follow to earn points towards the quiz by doing further practice and/or corrections depending on the quiz. Next week, we'll be putting our knowledge of the scientific method into practice as we perform experiments students have designed. In math we'll be doing more work subtracting, multiplying, and dividing integers. (Schafer/Barron)

Week 5 Ending 10/7/16

Eastern Studies

This week in Eastern Studies, groups continued researching topics for their "Themes Around the World" project. Students dug deeper into the *5 Themes of Geography* and applied the terms to their region of the Eastern Hemisphere. Groups began exploring Folk Tales from their region and will select the folktale for the project on Monday. Next week they will begin to build their presentations in Prezi.com. Students will have a vocabulary quiz on Tuesday for the "Plot Structure" terms in Quizlet. Every night students should read for at least 20 minutes and reading journals are due every Friday. (Taylor/Bales)

"Talking Points" with your child

Ask your child about Quizlet.com for studying vocabulary words.

Ask your child about the book they are reading.

Ask your child about the self-designed experiment they'll be doing next week.

Ask your child to explain the New Tech SWLO's.

Life Skills

Students are presenting their Orientation project which highlights the main components of our culture at New Tech: Trust, Respect and Responsibility. (All teachers)
