# What's Happening?

7th Grade Newsletter

Week 3 Ending 9/23/16

## Mathematical Science

We've had a busy 3 weeks getting started here at New Tech. Our students are learning how to use their Chromebook, log in and use all of our online resources. They are also completing district pre-assessments in both math and science. We are about to launch our first project which involves the Number System and Scientific Method where our students become "Mythbusters." (Mrs. Schafer & Ms. Barron)

## Eastern Studies

In addition to working on our technological resources, we have started our first project. In *Themes Around The World* students will use the Prezi.com website to create "a virtual fieldtrip" of their selected region of the Eastern Hemisphere. Students will also present a folktale from their region, demonstrating understanding of themes in literature. (Mrs. Taylor & Mr. Bales)

## Life Skills

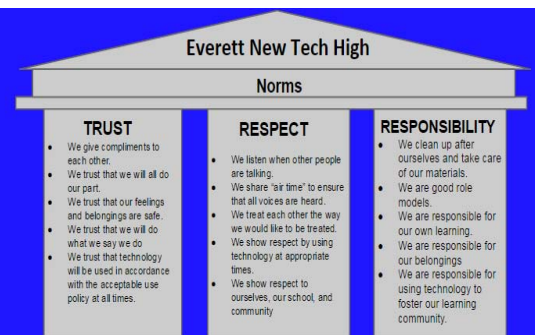

We are continuing to work on our Orientation project which highlights the main components of our culture at New Tech: Trust, Respect and Responsibility. (All teachers)

Students work hard to learn how to use our online assessment programs.

## "Talking Points" with your child

What does the image below mean to you? How are these "norms" helpful in your life?

**Mission Statement:**

Our mission is to build a culture that empowers and engages by using technology that enables learners to develop a growth mindset to be college and career ready.
